Abstract:

"A NEW SENSE TO STOP NONSENSE"

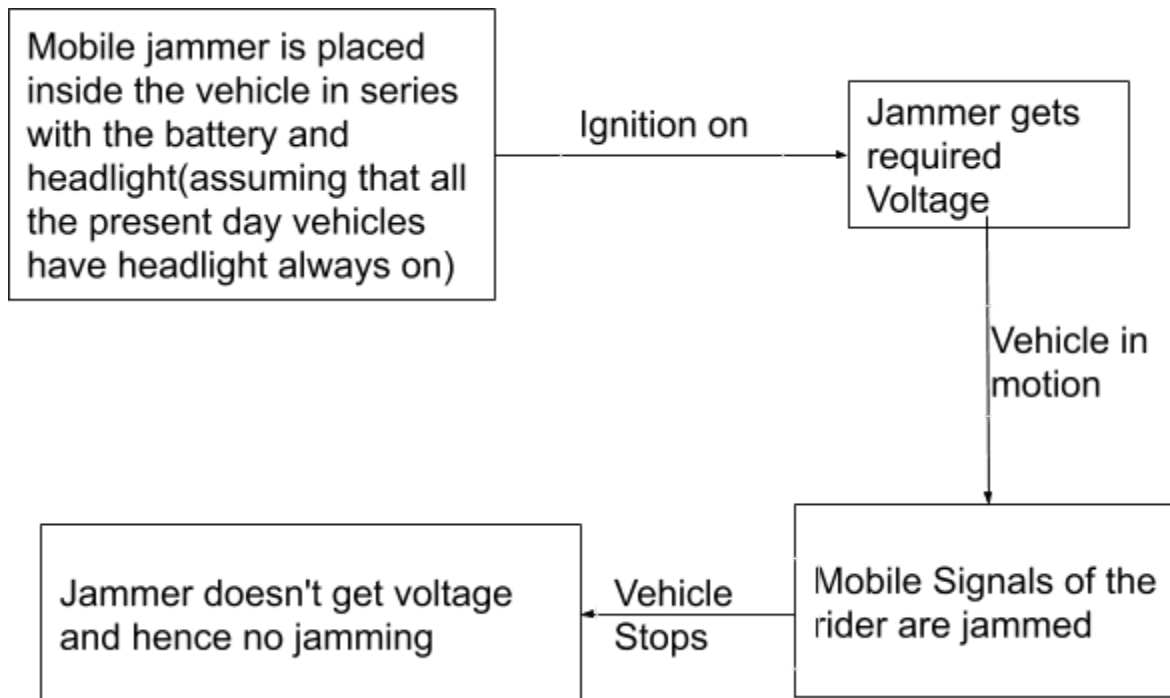

Device name: MOBIKE JAMMER

This device ought to Jam both incoming and outgoing mobile signals of any mobile network within half meter radius as soon as the rider turns on the ignition key. We would like to support all RTOs to manditate this feature in every vehicle(bike/car/van/lorry).

Motivation:

Nearly 40-60% of accidents are caused because of using mobile while driving, which reduces rider's concentration and leads to such mishaps.

Methodology:

Social Impact:

Number of accidents will reduce and hence is beneficial to mankind.

Market Survey:

All two wheeler riders.
